EDUCATION

Georgia Institute of Technology

Atlanta, GA

B.S in Computer Science

Aug. 2024 – Dec. 2027

- **Relevant Coursework:** Object Oriented Programming, Data Structures and Algorithms, Computer Organization and Programming, Computer Networking I, Systems and Networks, Objects and Design, Intro to Database Systems, Intro to Info Visualization

EXPERIENCE

Undergraduate Teaching Assistant – Data Structures & Algorithms

Aug. 2025 – Present

Georgia Institute of Technology – College of Computing

Atlanta, GA

- Collaborate with a team of 30+ teaching assistants to support a class of 700+ students each semester
- Teach 75-minute recitation sessions weekly, solidifying student understanding of course content and answering student questions
- Conduct weekly office hours to assist students' understanding of Java coding assignments, lecture materials, and exam content

Data Platform Engineering Intern

May 2026 – Aug. 2026

Gordon Food Service

Atlanta, GA

- Audited 250+ GCP datalabs using Python and SQL, collaborating with 50+ product owners to decommission inactive environments and optimize cloud resource utilization
- Engineered a Customer Data Platform (CDP) dashboard using SQL and Google Data Studio to track and visualize key operational tracking metrics
- Resolved 20+ tickets covering data requests and governance, maintaining and enhancing AI file ingestion and API pipelines via Terraform

AI Technology Intern

Jul. 2025 – Aug. 2025

CuraeSoft

San Ramon, CA

- Designed a Retrieval-Augmented Generation (RAG) prototype that integrates Elasticsearch and Kibana with a Spring Boot backend to index clinical and patient-care records
- Conducted a technical feasibility analysis of the open source Medplum library and presented findings and next-step recommendations to engineering leadership

PROJECTS

Stinger Delay | *Python, PostgreSQL*

Jan. 2026 – Present

- Design a normalized SQL database, translating requirements into an ER diagram and optimizing schema to support a real-time campus bus delay tracking system
- Engineered staging-to-core ETL logic, writing SQL scripts to transform, validate, and load cleansed data from staging tables into production tables

Empathy Bytes | *Figma*

Aug. 2025 – Present

- Collaborate with team members to redesign the Empathy Bytes website, using Figma for prototyping and wireframing the redesigned site
- Lead the UX design for a digital archive, prototyping and wireframing a web interface in Figma designed to collect and showcase handwritten stories from Georgia Tech students

1 Fish, 2 Phish | *Python, Streamlit, Google Gemini API*

Mar. 2025

- Developed educational game about the dangers of LLM-generated phishing emails using Google Gemini API and Streamlit for frontend
- Engineered a pipeline to ingest, clean, and transform real phishing email datasets into structured prompts for Google Gemini API

TECHNICAL SKILLS

Languages: Java, Python, C/C++, SQL (MySQL, PostgreSQL), JavaScript, HTML/CSS

Frameworks & Libraries: React, JUnit, pandas

Cloud, DevOps & Databases: Google Cloud Platform (GCP), Terraform, Docker, Firestore, Git, GitLab, Bitbucket, Google Data Studio
